
Above - Soil Analysis Chart

Soil Slope / Erosion legend for the soils listed on the following page - The letter following the soil number indicates a general range of slope, usually within the following ranges: "A" slope 0% to 2%; "B" slope 2% to 5%; "C" slope 5% to 10%; "D" slope 10% to 18%; "E" slope 18% to 25%; "F" slope 25% to 35% and "G" slope 35% or greater. The number "2" following the letter indicates moderate erosion, and the number "3" following the letter indicates severe erosion. The productivity of the farm is calculated by weighting or averaging the productivity index of each individual soil type on the farm. When the percentage of each type of soil on the farm is known, a weighted Productivity Index is calculated for the farm.
